Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Woods (5,299,836). Woods discloses the use of a pipe connector system having a pipe connector for attachment relative to a channel (3) in a canal (1), the connector having a first portion with an upstanding wall (12) and a floor from which the wall extends, a first tubular extension (6) projecting from the floor and having flow passage extending there through and the system further having a transverse wall (2) extending across the channel and downstream of the connector and extending upwardly in the channel from the upstanding wall. In regards to claim 2, wherein tubular extension has a circular transverse cross sectional shape, see figure 1. In regards to claim 3, wherein the tubular extension terminates in a merging section (4) and a second tubular extension extends (7) from the merging section. In regards to claim 4, wherein the first and the second tubular extension have a circular transverse cross sectional shape. In regards to claim 5, wherein central longitudinally extending axis through the first extension is offset relative to a central longitudinally extending axis through the second extension.

Art Unit: 3636

In regards to claim 6, including low flow passages (9) on sides of the upstanding wall and between a lower edge of the transverse wall and a base (37) of the channel. In regards to claim 7, wherein the first tubular extension has a length of about 4 inches. In regards to claim 8, wherein the tubular extension has a length of about 2 inches.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to down pipe connector: U.S Pat. No. 4879771, 3893919, 3703302, 4306738, 4730854, 4739524, 4850617, 4964180, US005297817A, US005341523A, US005618416A, US006185885B1, US006405502B1, US006647682B2, US005358006A, 5658092, and 4641464.
